

Layered Hellebore Flower Card with Embossed...

8 SEPTEMBER 2026

Craft a stunning hellebore flower card with layered pink and white petals edged in deep burgundy tones. Using pre-printed double-sided paper, you'll create realistic depth without colouring by die-cutting, shaping and layering the botanical elements with coordinating green leaves. The technique involves curving petals for dimension and assembling the flowers with embossed details for an elegant, sophisticated finish.

From our live show **HSN PRODUCT INSPIRATION** - Join me for a fun filled show broadcast 8th September 2026 (8 September 2026) - watch it from 22:45.

WHAT YOU WILL NEED

See the show for everything used.

STEP 1

Select a coloured paper from the hellebore collection. Note that the papers feature pre-printed shading and veining on both sides to create realistic flower petals.

Watch this step: 22:45 into the show

STEP 2

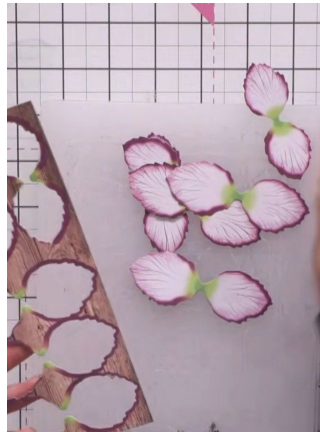

Place the connected die set onto your die-cutting machine, ensuring the paper is positioned correctly with the printed side facing up. Store the dies back in their packaging when finished.

Watch this step: 23:00 into the show

STEP 3

Run the die set through your die-cutting machine in one pass to cut all three flower sizes and the accompanying leaves simultaneously. Store the cut pieces back in the decant packaging to keep them organised.

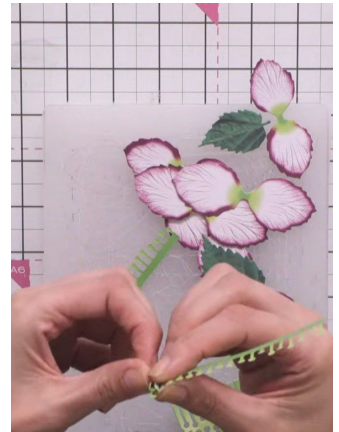

Watch this step: 23:15 into the show

STEP 4

Pop out all the cut pieces from the carrier sheet.

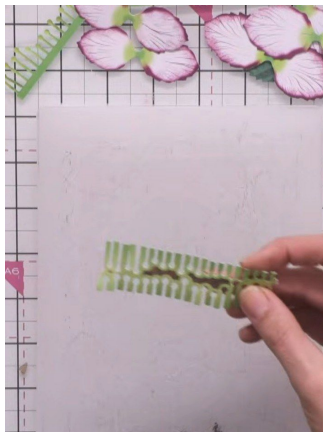

Remove the flowers, leaves and other elements carefully, revealing the double-sided printed pieces ready for assembly.

Watch this step: 27:30 into the show

STEP 5

Layer the three flower sizes together, starting with the largest at the bottom, then the medium, and finally the smallest on top. Use a small spot of glue in the centre to secure each layer.

Watch this step: 28:45 into the show

STEP 6

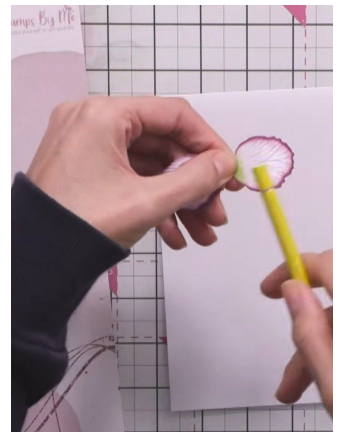

Position the two green leaves beneath the layered flowers, angling them naturally to frame the bloom. Place one leaf on each side of the flower arrangement.

Watch this step: 29:00 into the show

STEP 7

Roll the small sprigly element from the stamp set and secure it in the centre of the flower with glue to create a 3D centre piece.

Watch this step: 29:15 into the show

STEP 8

Adhere the completed flower cluster to your card base. Position the pink-edged petals and leaves as desired to create your focal point arrangement.

Watch this step: 32:00 into the show

TIPS FROM THE SHOW

- The double-sided printed paper eliminates the need for colouring, as the pre-printed shading creates realistic depth and dimension.
- The connected die system means all pieces stay together, preventing loss of small elements.
- You can interchange leaves from different flower sets if you own multiple collections to create varied designs.
