

Interactive 3D Gnome Character Card with Layered...

10 OCTOBER 2025

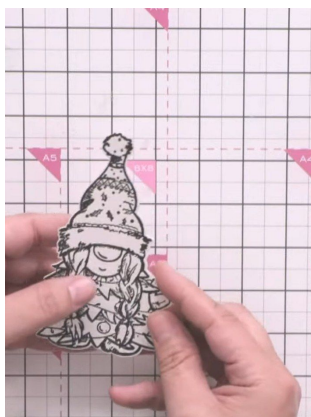

Create a delightful interactive Christmas card featuring a charming gnome character perched atop a layered Christmas tree. The design showcases vibrant colours including coral red, festive green and white, with dimensional die-cut elements that bring texture and depth to your card. This project uses layering and die-cutting techniques to create a three-dimensional effect with moveable elements.

From our live show **ONE DAY SPECIAL - Join Toni and Simon for the brand new launch - Broadcast 10th October 2025** (10 October 2025) - watch it from 36:45.

TIPS FROM THE SHOW

- You don't have to be precious with colouring; you can go over the embossing as it's now secure.
- Lighter colour at the bottom and darker at the top of the hat helps it lift and look 3D even when flat.
- The die-cut creates interactive elements like moveable pigtailed that add playfulness to the card.
