STEP 2

Notice how the reflection is built into the stamp design. The silhouette figure and its reflection are part of the same stamp image, so you only need to stamp once to create the complete effect.

STEP 3

Stamp the same image again on a separate piece of white card. This time, create a shadow effect by making the top darker with blue tones and the bottom lighter with orange tones, keeping the silhouette dark throughout.

TIPS FROM THE SHOW

- The reflection is built into the stamp, so you only need to stamp once to get both the image and its reflection.
- Normal card stock drinks ink quicker than watercolour card, so you have less time to move the ink around.
- Watercolour card stock gives better results as the colour blends and bleeds together more smoothly.
