

Foiled Butterfly and Floral Design on Card Stock

3 JUNE 2024

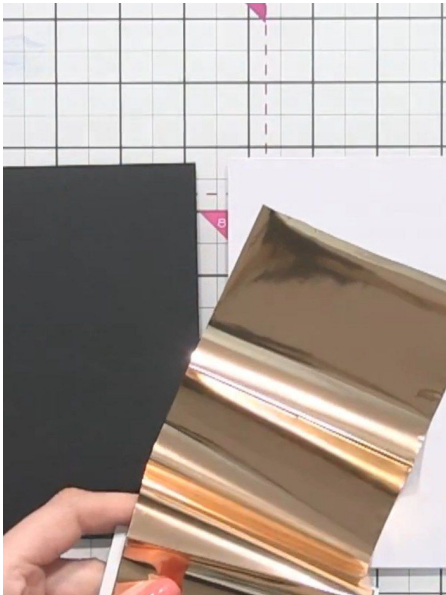

Create a beautiful foiled butterfly design on white card stock with an elegant metallic gold finish. Using sticky ink, bonding powder and foil sheets, you'll achieve a shop-bought quality foiled effect without needing a foiling machine. This stunning technique produces a professional metallic shine on your stamped images, perfect for cards and paper crafts.

From our live show **MY PODCAST - Catch my latest updates broadcast 3rd June 2024** (3 June 2024) - watch it from 43:00.

WHAT YOU WILL NEED

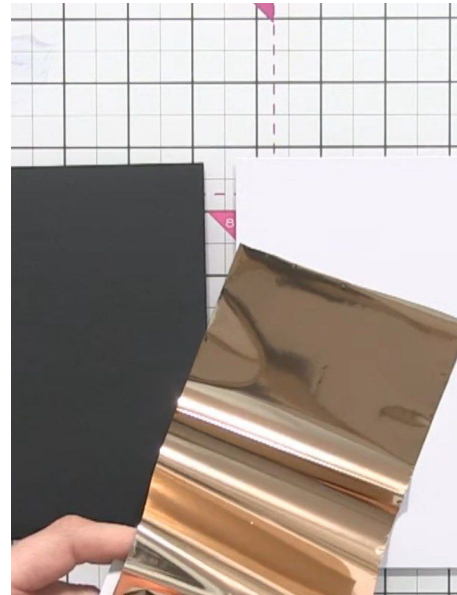

See the show for everything used.

STEP 1

Gather your materials for this project: foil sheets in your chosen colours (such as rose gold), bonding powder, a sticky ink pad, a heat gun, and your selected stamp set.
Watch this step: 43:00 into the show

STEP 2

Cut two pieces of rose gold foil from the sheet to the length of your black card blank using sharp scissors.
Watch this step: 44:00 into the show

Stamp your chosen design (butterfly or floral) onto white or black card stock using the sticky ink pad. Stamp twice to ensure full coverage and detail. The gold foil will adhere to the stamped areas in the next step.
Watch this step: 45:00 into the show

STEP 4

STEP 5

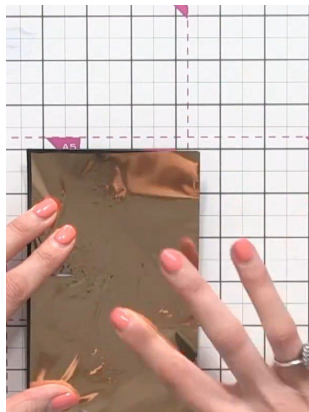

Sprinkle the bonding powder generously over the stamped floral design on the black card. Ensure the powder covers all areas of the stamped image completely.
Watch this step: 50:00 into the show

Place the stamped black card stock onto white card stock to catch any excess powder. Use a heat gun to melt the embossing powder, holding it about 15cm above the surface for approximately 60 seconds until the powder becomes clear and shiny.
Watch this step: 50:45 into the show

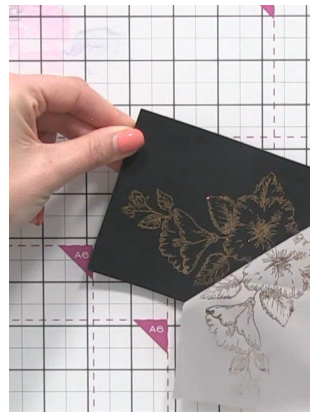

STEP 6

STEP 7

STEP 8

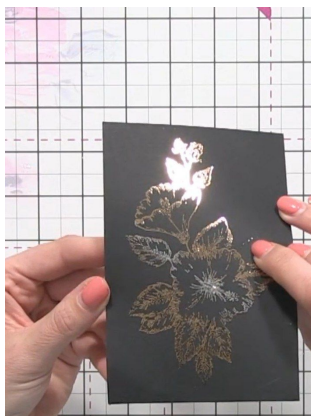

Place your foil sheet on top of the heated bonding powder, ensuring it covers the stamped design completely. The foil should be placed shiny side up over the black card stock.
Watch this step: 53:30 into the show

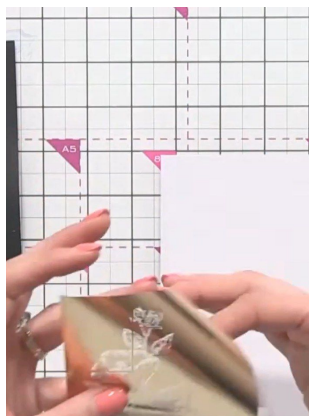

Burnish the foil firmly over the design using your finger. Work carefully into all the detailed areas to ensure complete coverage of the stamped image.
Watch this step: 53:45 into the show

Carefully peel back the foil sheet from the black card stock to reveal the foiled floral design underneath.
Watch this step: 54:30 into the show

STEP 9

STEP 10

Check the foiled design for any missed spots. If you find areas where the foil hasn't adhered, reheat the bonding powder in those areas with the heat tool and reapply the foil.

Watch this step: 55:00 into the show

Use an eraser to gently remove any foil that has transferred outside your stamped design. Work carefully to clean up the edges whilst preserving the gold foiled floral image on the black card.

Watch this step: 55:15 into the show

TIPS FROM THE SHOW

- Use an anti-static bag over your card stock before stamping to prevent foil sticking to unwanted areas.
- The bonding powder must be from the Wow brand as other embossing powders will not work with the foil.
- If parts of the design don't pick up foil, simply reheat and reapply rather than starting over.
