

Five-Layer Rose with Stencil System

9 MAY 2024

Create a beautiful dimensional floral design featuring layered roses in soft purple and pink tones with delicate green leaves. Using a five-layer stencil system with coordinating inks, you'll build up realistic depth and shading to achieve a watercolour-style painted effect. This elegant technique produces stunning results perfect for cards and papercrafts.

STEP 3

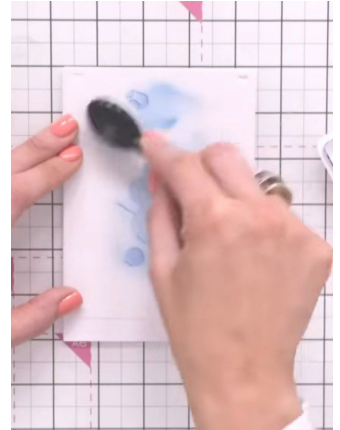

Apply teal ink through the stencil using a blending brush with light pressure. Remove the stencil carefully to reveal the blended design. **Watch this step:** 1:08:15 into the show

STEP 4

Position stencil number two over your first layer. Apply pink or purple ink using a blending tool to build the next layer of the rose with light, gentle strokes. **Watch this step:** 1:08:30 into the show

STEP 5

Position stencil number three over your flower design. Apply a deeper purple ink through the stencil using a blending brush to add dimension and depth to the petals. **Watch this step:** 1:08:45 into the show

STEP 6

Apply stencil number four with green ink to create the leaves and foliage around the rose. Use a blending tool to apply the ink through the stencil onto your card. **Watch this step:** 1:09:00 into the show

STEP 7

Apply stencil number five (the detail layer) to your stamped rose design. Using black or dark ink with a blending brush, add fine lines and definition through the stencil to complete the layered rose effect. **Watch this step:** 1:09:15 into the show

STEP 8

Once all stencil layers are complete and dry, use the coordinating die to cut out your finished rose design from the card. **Watch this step:** 1:09:30 into the show

TIPS FROM THE SHOW

- The stencils are numbered and etched so you cannot go wrong—follow the numbers in order.
- You only need a couple of ink pad colours; press harder for darker shades and lighter for softer tones.
- If you only have one green ink pad, press harder to get a darker shade rather than buying multiple colours.
